Introduction for General Catalogue

FRIENDS, we give you greeting. The beginning of each year brings to us a keen sense of responsibility, but this year more than ever before, for reason that, last year, enough of you had confidence in us so that we doubled our entire business. We expect to do as much business this year as we did last and therefore, twice the burden of responsibility is thrown upon us that existed two years ago. We realize as never before, that we are responsible for a considerable portion of your crops of corn and wheat; of meadow and pasture; for your garden and truck field; your plant food in form of fertilizers and last, but not least, for your flowers. We realize that not only must our intentions be good, but that we must have the skill and ability to carry those intentions through to a successful termination; that we must not only be able to fill your orders, but to fill them promptly and accurately; and finally, we realize that for your sake as well as ours, the business must be managed economically and efficiently, or else it will not be successful, no matter what volume it may have.

It is with these thoughts in mind that we begin a new year, and we pledge ourselves, not only to try to serve you, but to be so efficient that it will be a pleasure to both of us to deal with each other.

***The* WING SEED CO.**

Mechanicsburg, Ohio

A Catalogue Every Other Year

OWING to the extreme cost of paper and of printing, we have definitely decided from now on, to issue a catalogue only every other year. This will make a saving of many thousand dollars to us, and we will give you the benefit of that saving. We have a moderate number of 1920 catalogues left over from last year. We will send these where they are most needed as long as they last, but we are printing no new catalogue this winter. In 1921 we will print a new one and will try to make it so attractive in every way that you will want to keep it for two years. In the meantime, we will issue new price lists as often as they are needed, and at least one each year.

We believe that after you have thought this matter over you will approve of our course.

For Foreign Countries the postage rate is
12 cents a pound or fraction of a pound.

ASPARAGUS

Washington Asparagus—Heretofore we have offered five varieties of Asparagus—Bonvallet's Giant, Columbian Mammoth White, Conover's Colossal, Early Giant Argenteuil, and Palmetto. We still think these are good in their respective types but with Asparagus it seems to us that only the best should be used for it is pretty much of a permanent investment. Washington Asparagus is a variety developed at the Asparagus Substation of the Massachusetts Experiment Station at Concord, and under the direction of the Bureau of Plant Industry of the United States Department of Agriculture. This work was begun in 1906 and from a single plant discovered in 1910 this strain has been developed.

The desirable features of this new strain have seemed to us to be so decided that we are offering it almost exclusively. That is we have retained only very limited stocks of the older varieties. The new variety is vigorous, high yielding, quite uniform, of large size, rapid in growth and rust resistant. We know of no other variety that combines all of these features and we therefore do not believe our customers would want us to continue to push less desirable varieties.

Cat. No.	Variety	Prices				
		Pkt.	Oz.	¼ Lb.	½ Lb.	Lb.

PEAS

First Early

Cat. No.	Variety	Pkt.	½ Lb.	Lb.	2 Lb.	10 Lb.
A349	Alaska.....	8c	20c	35c	60c	\$2.50
A350	American Wonder.....	8c	23c	40c	65c	2.60
A351	Blue Bantam.....	8c	25c	45c	75c	3.00
A351½	First and Best—An excellent extra early variety practically identical with Extra Early Pedigree and very similar to Prolific Early Market. Vines slightly more dwarf and pods a little shorter than the two varieties mentioned.....	8c	20c	35c	60c	2.50
A352	Little Marvel.....	8c	30c	55c	90c	4.00
A352½	English Wonder—Little Marvel and Sutton's Excelsior find an excellent substitute in this variety, it being possibly two or three days later in coming into picking condition. Height of vine about the same and pod has same characteristics as to size and shape. A splendid cropper and variety for the Market Grower.....	8c	20c	35c	60c	2.50
A353	Market Surprise.....	8c	23c	40c	65c	2.60
A354	Nott's Excelsior.....	8c	23c	40c	65c	2.60
A354½	Pedigree Extra Early—The description of First and Best will serve also for this variety. The vines are a trifle taller and pods a little longer and it usually matures a day or so before First and Best...	8c	20c	35c	60c	2.50

Second Early to Midseason

A355	Gradus or Prosperity.....	8c	25c	45c	75c	3.00
A356	Premium Gem (Little Gem).....	8c	23c	40c	65c	2.60
A356½	Pilot—This variety can properly be considered a smooth seeded Gradus. The vines of the two varieties are practically the same in height, they mature at the same time, and the pod of the Pilot is a trifle shorter than the Gradus.....	8c	20c	35c	60c	2.50
A357	Prodigious.....	8c	23c	40c	65c	2.60
A358	Thomas Laxton.....	8c	25c	45c	75c	3.00

Midseason to Late

A359	Advancer.....	8c	20c	35c	60c	2.50
A360	Alderman.....	8c	25c	45c	75c	3.00
A361	Boston Unrivalled.....	8c	23c	40c	65c	2.60
A362	Buttercup.....	8c	23c	40c	65c	2.70
A363	Champion of England.....	8c	25c	45c	75c	3.00
A364	Duke of Albany.....	8c	25c	45c	75c	3.00
A365	Dwarf Champion.....	8c	20c	35c	60c	2.50
A366	Everbearing.....	8c	20c	35c	60c	2.50
A367	Horsford's Market Garden.....	8c	20c	35c	60c	2.50
A368	Improved Stratagem.....	8c	23c	40c	65c	2.60
A369	Laxtonian.....	8c	25c	45c	75c	3.00
A370	Quite Content.....	8c	25c	45c	75c	3.00
A371	Peter Pan.....	8c	25c	45c	75c	3.00
A372	Pioneer.....	8c	25c	45c	75c	3.00
A373	Potlatch.....	8c	23c	40c	65c	2.60
A373½	Profusion—Very similar to Telephone although, pod not quite so large. Often used by canners as a substitute for Telephone, although the picking season is two or three days later. Also known as Prince of Wales and by one seedsman as Sweet Market.....	8c	20c	35c	60c	2.50
A374	Telephone.....	8c	25c	45c	75c	3.00
A374½	World's Record—The earliest strain of the Gradus family, although the pod is not quite so large as that of Gradus, Early Morn and Marchioness. Much planted but we greatly prefer Market Surprise as a first early large podded type.....	8c	20c	35c	60c	2.50
A375	Yorkshire Hero.....	8c	20c	35c	60c	2.50

Edible Podded or Sugar Peas

A376	Dwarf Gray Sugar.....	8c	20c	35c	60c	4.00
A377	Mammoth Podded Sugar.....	8c	20c	35c	60c	4.00

FIELD SEED DEPARTMENT

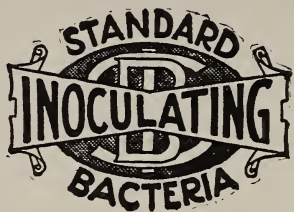

In this supplementary list covering the field seeds we have indicated only the changes that have been made in the regular 1920 catalogue. Only one item has been eliminated, this being the Mulford Cultures and in their place has been substituted the Standard Inoculating Bacteria herein described. The other descriptions appearing are of items covering which no description appeared in the regular 1920 catalogue. Our supplementary field seed price will be issued at frequent intervals as usual.

ALFALFA

Orenberg—This variety is another one of Dr. Hansen's importations and although it was not recognized at first as being so useful, we find by actually testing it out that there is a very good use for it. On account of its peculiar characteristic of throwing shoots from underground stems we believe that it will become a wonderful pasture plant. The seed, of course, is high priced at this date as not much has been produced but we hope that each one of our customers will try out a small amount of the Alfalfa under some condition such as a small pasture lot or a run to which the chickens or other fowls are given access. The new seeding should be protected for at least a year as the underground stems do not start their shoots until the second or third year, but after they are started we see no reason why this plant will not withstand all kinds of abuse and punishment. Try it out now that you may be acquainted with its merits when the seed is on the market in sufficient quantities to allow you to put out heavier seedings. Note our price list for quotations. We have a reselected Orenberg Alfalfa which we hope is a trifle better than the old. We will describe it in next year's catalogue in full. As with all other field seeds we do not care to advertise this Alfalfa until we are sure of its merits.

SOY BEANS

Wing's Mikado—This variety is our largest moderately late variety. It matures in from 110 to 120 days. Is very leafy and a heavy yielder of large yellow grain. It is one of the sturdiest Beans that we sell and is very useful for seeding in Corn for silage or for seeding solid for silage work. It is useful both on poor and rich soil. Does not run to vine and branches heavily and high enough from the ground that it may be well taken care of with a mowing machine. One of our own originations.

The Guaranteed Legume Inoculator

Standard Inoculating Bacteria is scientifically prepared direct from the nodules by bacteriologists who are specialists in this line and in a laboratory fitted up with the most modern and technical equipment. These cultures are developed in a super-sensitive agar-gelatin medium in amber colored glass bottles with rubber corks and with glass ventilating and filtering tubes assuring long life at highest vitality. Will keep and retain vitality for years. This manner of development and the style of carrying containers are recognized to be the most advanced in the field of bacteriology.

The price of Standard Inoculating Bacteria is low but better cultures cannot be developed at any price. It is the high quality and low price that have caused Standard Cultures to be the most widely used cultures in the world. At these popular prices not only can every grower of legumes afford to inoculate all of his legume crops but none can afford not to use them. They are the insurance policy on abundance of nodules and bumper crops.

Standard Inoculating Bacteria is prepared for the following:

Alfalfa	Alsike Clover	Vetch
Sweet Clover	Soy Beans	Peanuts
Red Clover	Cow Peas	Velvet Beans
Crimson Clover	Garden Beans	Burr Clover
Mammoth Clover	Garden Peas	and all other legumes

6 acre size \$3.00; 4 acre size \$2.25; 2 acre size \$1.45; 1 acre size 75c; 1/2 acre size 50c.

Be sure to state crop to be inoculated.

Standard Inoculating Bacteria is fully guaranteed.

Introduction to Flower Department

I KNOW little about cities, but here in the country twenty-five years ago, we grew at least ten times as many flowers as we have today. My mother was a flower lover and she utilized not only every available bit of ground that was suitable for flower beds, but she had one or two small flower gardens as well. She spent days of time planning each and every bed of flowers and the result was always lovely. Strangely enough, during the intervening years, while we have grown fewer and still fewer flowers in our yards, the hybridists have been patiently working miracles in the improvement of these same blooms. My mother had only one variety of Gladiolus, *Brenchleyensis*, one of the plainest things in commerce today in the Gladioli. She had only one Iris, the Florentine, and only two or three Peonies, the *Officinalis* varieties. In Dahlias, she had varieties of the show type, with blooms not much larger than a walnut. There is simply no comparison between any of these varieties and the perfect specimens that the hybridists have given us today. So I think we have every reason to return to flower growing on the same scale that it was practised twenty-five years ago.

Do you wish to save money? Flowers are never expensive, but during the past year we have worked out a club principle, whereby you and some of your neighbors, your literary society or other women's clubs or your church organizations can save a good deal of money by ordering as a unit, instead of as individuals. If you are interested, write for details on this point.

Over in Canada they have a beautiful custom. Some of the churches grow flowers, both to decorate the altar and to furnish bouquets for the sick. The cost is not great and I wonder if this would not do really more good than some other forms of church activities. We are glad to co-operate with any church society that wants to try this plan.

During the past year it has been our pleasure to help beautify some of the finest Parks in the country. We are in position to do this upon any scale and to make prices below wholesale for such work. We have also helped to beautify several schools and college campus grounds and we are glad to make prices below wholesale for that kind of work.

Most of all, however, we would like to help you to make a flower garden, such as most people had twenty-five or thirty years ago, and we believe that would be a step towards higher civilization.

GLADIOLI

No. 5000—Marguerite Wing. A year has passed since our little girl left us for the great Beyond. This beautiful flower, named for her by permission of a great European hybridist who produced it, is eminently fitted to bear her name. We consider it the finest red that we have ever seen. It is not a giant, just medium size, but a glowing jewel of a flower, of the purest, most brilliant cardinal red. In texture it is shimmering satin, with some darker velvety flecks, Orchid type, with waved edges to the petals, the spike long and well furnished, reverse of petals on edges and bud show a pale carmine lake in soft contrast to the deeper tone. Price \$10.00.

Gladioli prices are prepaid.

DAHLIAS

A few of our varieties of Dahlias have become so low that it is necessary for us this year to quote plants only instead of bulbs. We will send vigorous plants and make the price as reasonable as possible.

Dahlia prices are prepaid.

NEW DAHLIAS Cactus Flowered Varieties

Cat. No.	Variety	Prices Each
6225	Alice G. Underwood (Cactus)—Very large full flower. Petals very long, strongly incurved. Pale hortensia rose, tipped lemon yellow, center pale lemon yellow, striped deeper. Coloring delicate and beautiful. A flower of great distinction.	\$1.50
6226	Daimo (Cactus)—Very large flower of elegant form, full and thick. Petals strongly incurved. Brilliant fire red, brightened with gold at base, slightly violet at tips. A flower possessing refinement and splendid coloring. Very free.60
6227	Glaive—Very large flowered, Hybrid Cactus type, thick and full to center. Petals strongly recurved. Rich dark velvety crimson with purplish reflections. Distinct and beautiful.75
6228	Kathleen Bryant (Cactus)—Good sized flower, petals long, narrow, incurved, purplish red shaded maroon, variable. Some flowers have these shades finely striped and dotted on a ground of cerise.50
6229	Marotte (Cactus)—Large full flowered, petals strongly incurved, brilliant fire red.40
6230	Ophir (Cactus)—Dainty little flowers of pale primrose yellow. Petals long, medium width, slightly curled. Shows a small center of stamens of rich sunflower yellow. Foliage fern leaved. Plant very graceful with numerous slender branching stems, crowned with a profusion of blooms.75
6231	Pegasus (Cactus)—Very large flowers, petals very long and narrow, strongly incurved, forming a cup. Coloring very fresh and pretty, delicate lilac rose, finely lined and dotted with purplish red, haloed pale lemon yellow. Center of sunflower yellow stamens quite prominent. Stems very long, slender and graceful.75
6232	Silver Wings (Cactus)—This flower is absolutely perfect in form. One of the most chaste and elegant Dahlias we have ever seen. In type it is straight petaled Cactus, formed with utmost regularity. Color, very deep cream. Flower of heavy texture. Waxed appearance Beautiful as a lily.75
6233	Splendida (Cactus) — Large full flowers, petals very long and narrow, strongly incurved. Base of petals apricot, passing to soft solferino at tips. Free flowering with long stems. Coloring unique, rich and beautiful.50
6234	Star Dust (Hybrid Cactus)—Large, finely formed flower. Clear, deep golden yellow. Free flowering with long stems. One of the best that we have.75
6235	William Dickson (Cactus)—Hybrid Cactus type. Medium flowered. Produced in greatest profusion. Coloring extremely brilliant carmine. Satiny texture. While not a giant, this flower is of distinct coloring and very effective.25

Peony Flowered Varieties

6236	Cleopatra (Peony)—Large full flowered, regularly formed, somewhat cup shaped. Color, cardinal red and lemon color, red predominating. Around the center is a well defined halo of yellow. Tips are variably yellow, stems long and slender, a flower of unusual and rich coloring, but not gaudy.50
6237	Eva D. Rosewarne (Peony)—This flower is like a precious stone in its beauty, depth and brilliancy of coloring. It reminds the writer of a painting, by Gerome, seen long ago, which might have been painted with melted emeralds and rubies. It is of medium size, and only moderately full. Its merit is in its beauty of color, Cochineal carmine. An occasional touch of white appears here and there. Plants \$3.00. Bulbs \$1.50.	
6238	Goire de Grenoken (Peony)—Very large, full, flat flower. Petals broad, long, twisted and curled. Pale yellow tinted rose.50
6239	Mrs. F. Boyer (Peony)—Large flowered, full and thick, petals somewhat curled. Coloring, a mingling of carmine rose and amber yellow, reverse of petal carmine rose. Very strong and vigorous plant. A good variety.75
6240	Negus (Peony)—Immense flower, full and thick. Petals strongly incurved. Rich geranium lake, brilliant and glistering.75
6241	Phidas (Peony)—Large flower. Petals broad, curled and twisted. Coloring, rich and good. Rose Nilsson (deep rose pink), passing to gold at base with gold sheen over all surface. Here and there a golden stripe. A slight tinting of violet at tips.75
6242	Garland (Peony)—Enormous flowers, very full, petals broad, curled and twisted. Very soft pale yellow, brightened gold, shaded deep apricot at base of petals. Rich and striking flower.	\$1.25

PEONIES

For some years we have been thoroughly convinced that it was all wrong to dig Peonies in the spring; a practice that was injurious to the grower and unsatisfactory to the customer. We are now going to follow up this conviction by announcing that we will ship no more Peonies in the spring. All deliveries will be made in the fall. We feel sure that this policy will be of as much advantage to our customers as to ourselves.

Peony prices are not prepaid. If wanted by mail, add postage at the rate of 1 lb. for every 2 roots.

IRISES

WITH the present cost of labor, the time has passed when we could afford to send a man to the field, where he walks over considerable ground and have him dig ten or fifteen cent Irish plants, bring them in to the warehouse, wrap them and pack in high priced containers and send them out without an actual loss in the operation, even forgetting that the plants had any intrinsic value in the beginning. On the other hand, certain varieties of Iris are plentiful and are not worth a high price for an individual plant. In order to continue to give you low priced plants, and still make the operation moderately profitable on our part, we are pricing the lowest priced varieties, three plants in a place. This means that we will not fill one plant of these low priced varieties, but we will give one customer three plants, which will be an order of sufficient size, so that we will not lose money in filling it. Therefore, please do not order single plants where we have quoted them in lots of three in this price list.

The Bearded Iris should by rights be planted in the fall instead of in the spring. We hope that our customers will eventually change from their present method of ordering both in spring and fall and give us only fall orders. We have so many Iris orders coming in the spring, however, that at present, we do not feel like saying that we will refuse to fill any spring orders. We do say, however, that we will refuse to send spring orders out after the plants have made enough growth so that we think it is unwise to continue shipping them. Iris plants begin growing very early in the spring. Frequently we have a mass of orders at that time and frequently also, we have a lot of bad weather at that time. These three things do not work out very well together. Therefore, please remember that if we refuse to fill an Iris order for you in the spring, we are doing so, thinking that it is as much for our customers' benefit as our own.

IRIS

We give below a few excellent new varieties of Iris which we have been able to add this year. You will find each of these to be excellent and worth adding to your list. In most cases we give the introducer's description.

Iris prices are not prepaid. If wanted by mail, add postage at the rate of one pound for every four roots, two pounds for eight roots.

Tall Bearded

Cat. No.	Variety	Prices Each
8275	Alban Francois—Bluish purple and white.	35c
8276	Barbara (Foster)—A pretty form of Cengialti with soft blue coloring of Albert Victor. One and one half feet.	75c
8277	Bigotini—Velvety bronze. Moderate yellow and russet.	35c
8278	Chendolle—Velvety purple. Striped with slate.	35c
8279	Clementis (Bliss)—No Iris could be better named than this unique variety. The shape of the flower is more like a fine Iris Kaempferi or a large, six petaled Clementis. All six segments of the flower reflex horizontally. Color, light, clear violet with variable veining at base. Strong growing, free flowering and fragrant. Twenty-four to thirty inches.	\$5.00
8280	Dorak (Foster)—(Iberica x Cengialti)—(Pallida Seedling)—Standards soft blue violet, falls purple violet. Flowers large with bold free habits.	\$1.75
8281	Fairy Queen—Velvety blue. Striped and bluish white.	35c
8282	Garrick—Bluish violet and light blue.	35c
8283	Isola (Foster)—(Pallida x Cengialti)—Standards light blue, falls violet purple. Extremely neat and free flowering. Charming.	\$1.00
8284	Junonia—A new species from the east. Of exceptionally strong growth. Spikes from four to five feet high. Bears massive flowers the falls of which are violet purple and the standards a soft blue. One of the largest Bearded species known.	\$2.00
8285	La Beaute—A lovely form of Pallida. Very large, pale blue flowered.	\$1.00
8296	Madame Debura—Purple violet and bright blue.	35c
8287	Malvine—Reddish purple. Stripped white.	35c
8288	Mikado—An English seedling. One of the most distinct in color and habits. Except for the orange beard, the whole flower is heliotrope. The falls are a shade deeper than the standards. Two and one half to three feet with tall, narrow foliage.	\$1.00
8289	Mist (Foster)—(Pallida x Cengialti)—This has the neat rounded special typical flowers and habit of this cross with the lavender blue of Albert Victor.	35c
8290	Nine Wells (Foster)—Standards light violet, falls deep purple violet, showing a white ground at the throat. Smaller darker and more velvety than Amas.	50c
8291	Ossian (Var.)—Standards pale yellow, falls bright red. A. M. International Show, 1912.	50c
8292	Petite Vitry—Standards pale violet. Falls deep purple violet. Beards yellow on a white ground, reticulated with purple.	50c
8293	Poiteau—Reddish violet and dark blue.	35c
8294	Sarpedon—Reddish violet and dark blue.	35c
8295	Shelford Yellow (Foster)—Intermediate in color, between Foster's Yellow and the Germanica Aurea. It is distinct in having a neat brown veining at the throat.	50c
8296	Stamboul—A fine, large flowered variety. Standards, light blue, falls rich violet blue. Vigorous free flowering habits. Three feet high. Darker in color and broader in the falls than Caterina which it most nearly resembles.	\$2.00
8297	The President—Bronze purple with some maroon, yellow copper and orange color.	35c
8298	Virginia Moore—Perhaps the best yellow that has been introduced up to date. A deep yellow self, about the color of Haemeroallis Flava. Large flowers, tall, free flowering and well branched.	\$3.00

Dwarf Iris

8299	Ingeborg—A pure white intermediate with very large flowers of handsome form. Two feet.	50c
8300	Albatra Pumila—Lilac white.	35c

Siberian

8301	Siberica Alba Maxima—This is by all odds the finest Siberian that we have seen. It forms a perfect mass of flowers. About three feet tall, blooming for considerable length of time. Entirely distinct from the other Siberians, resembling a beautiful wild flower. Flowers large with faint blue and gold reticulations at the throat. Every visitor at our grounds last spring admired this plant.	\$1.00
